

Nichols understands that when fabric graphics are being used with fixed hardware displays such as truss, extrusions, or pop-up systems the finishing requirements need to be very precise. In order to meet the exacting demands of these projects a design engineer reviews each job to ensure that fabric selection, sizing, stretch factors, attachment methods, and all other technical aspects are met.

Expertise

Our exclusive substrates, unique methods for attaching graphics, and technical knowledge of multiple hardware systems has established Nichols as the industry leader in engineered graphic solutions.

Unbeatable Service

You will work directly with a fully trained in-house project manager who is dedicated specifically to your company, that is why we are known for our exceptional service and our ability to get the job done right.

Exceptional Quality

Engineered Fabric graphics have exceptional detail and smoothness as well as rich, vibrant colors.
